

No more DIY.

Outsource your fleet management

sgfleet Direct Business. Your dedicated fleet team.

sgfleet

Outsource your fleet management

We realise managing a growing fleet can take up plenty of time. Why not focus on what is important to your business and let us manage your fleet! We have the expertise and the fleet management services to provide you with the right solution.

As you grow your business, your fleet size may increase as well. Using a spreadsheet to manage a fleet of two may no longer work when managing a fleet of 30. You will spend more time and money doing so and it will become more difficult to control costs and ensure compliance.

Your dedicated Direct Business Team offers you:

- Advice on vehicle selection
- Reduced administration through online tools and expertise
- Walk-through and training of reporting platforms
- Regular reviews of your fleet's performance
- Assistance with policy development

Benefits to growing fleets:

Access to the same services and systems/tools that we offer large corporate and government customers

A high level of consultative customer services through our dedicated Direct Business Team, focused on optimising your fleet

Assistance with compliance processes: vehicle registration and insurance, recording infringements and driver behaviour management

An outsourced fleet consultancy service focused on driving the whole-of-life fleet cost down from purchase through to disposal
